

Pathway between apartments

Original Photo

This picture was taken on a sunny day, so there was a white cast and strong shadows. I was about 10ft from the bikes and the start of the path. I took the picture with my phone's camera set at 300ppi, 28mm, $f1.8$, $1/2088s$.

Edited Photo

In Photoshop, I first cropped the image to fit the foreground sidewalk, grass, and skyline within the rule of thirds. Then I adjusted the hue and increased the vibrance to brighten the grass and sky. I also used the clone stamp to remove the dirt from the sidewalk in the lower right.

Stickers on Light Pole

Original Photo

This picture of a light pole was taken at night, so there was an orange cast coming from the pole. I was about 3ft from the pole and took the picture with my phone's camera set at 300ppi, 28mm, $f1.8$, $1/4s$.

Edited Photo

In Photoshop, I first cropped and rotated the image to get the pole centered. Then I used the clone stamp to remove the white paper sticking out from the pole and remove a branch from the top left. I also selected the background and adjusted the curves to make it darker to make the pole even more of a focal point.

Blue jay

Original Photo

This picture was taken along the outside of the Millersville football stadium on a cloudy day, so there was a blue cast. I was about 10ft from the bird and took the picture with my phone's camera set at 300ppi, 28mm, f1.8, 1/1421s.

Edited Photo

In Photoshop, I first cropped the image to fit the focal point, the bird, in the center third. Then I increased the saturation of the entire image and a little more on the bird by itself. I also adjusted the curves to brighten the sky.

Apple Juice

Original Photo

This picture of a vending machine was taken inside the SMC, so there was a white cast. I was about 1ft from the bird and took the picture with my phone's camera set at 300ppi, 28mm, f1.8, 1/15s.

Edited Photo

In Photoshop, I first cropped the image to align the rows of drinks in the rule of thirds and put the focal point, the bottle of apple juice, in the top right vertex of the rule of thirds grid. Then I used the dodge and burn tools to highlight the apple juice and darken the surrounding bottles.
